**SUBJECT:**

Treasurer's Report for June 2019

**BACKGROUND:**

Attached is the Portfolio recap for June 2019. Some of the highlights are:

1. The overall portfolio average interest rate was 2.23 percent in June 2019, no change from May 2019.
2. The market value of the portfolio, including District holdings and debt proceeds, for June 2019 was \$533.3 million versus a book value of \$532.4 million. May 2019 market value was at \$539.8 million versus a book value of \$539.5 million.

As shown in the comparison below, the interest rates for three-year treasury bills ended the month of June 2019 at 2.53 percent, or eight basis point lower than the rate in May 2019. The U.S. Treasury bond yield curve is now inverted, meaning that the yield on short term maturities is higher than those of medium term maturities. The market had been expecting further interest rate hikes by the Federal Reserve but this did not occur. Conversely, the market has redirected towards a prediction of rate cuts for the second half of 2019. To safely navigate this turbulent and dynamic investment market, the District's investment strategy is focused on conservative, short-term securities, with 43 percent of the Portfolio invested in securities, which mature within 60 days to ensure liquidity and protect principal. The District's investment strategy during Fiscal Year 2018-19 emphasizes greater diversification and relatively short duration risk with purchases of Federal Agencies (target of 32 percent of portfolio), highly rated corporate notes (target of 13 percent of portfolio) and municipal bonds (target of 17 percent of portfolio). Investment targets are one to two-year maturities to reduce the impact of interest rate volatility while providing reasonable returns to meet the District's objectives.
