

# Addendum to the CEQA Initial Study and Mitigated Negative Declaration for Eucalyptus and Letterman Booster Stations Project

Alfred Javier  
April 11, 2019

# Eucalyptus Booster Station Project

- Eucalyptus Booster Station:
  - Replaces Elder Booster Station
  - Capacity increase- four (4) electric pumps
  - Demolition of existing Elder Booster Station after new station is constructed
- Letterman Booster Station:
  - Part of the initial CEQA document approval in 2010
  - Constructed in 2015

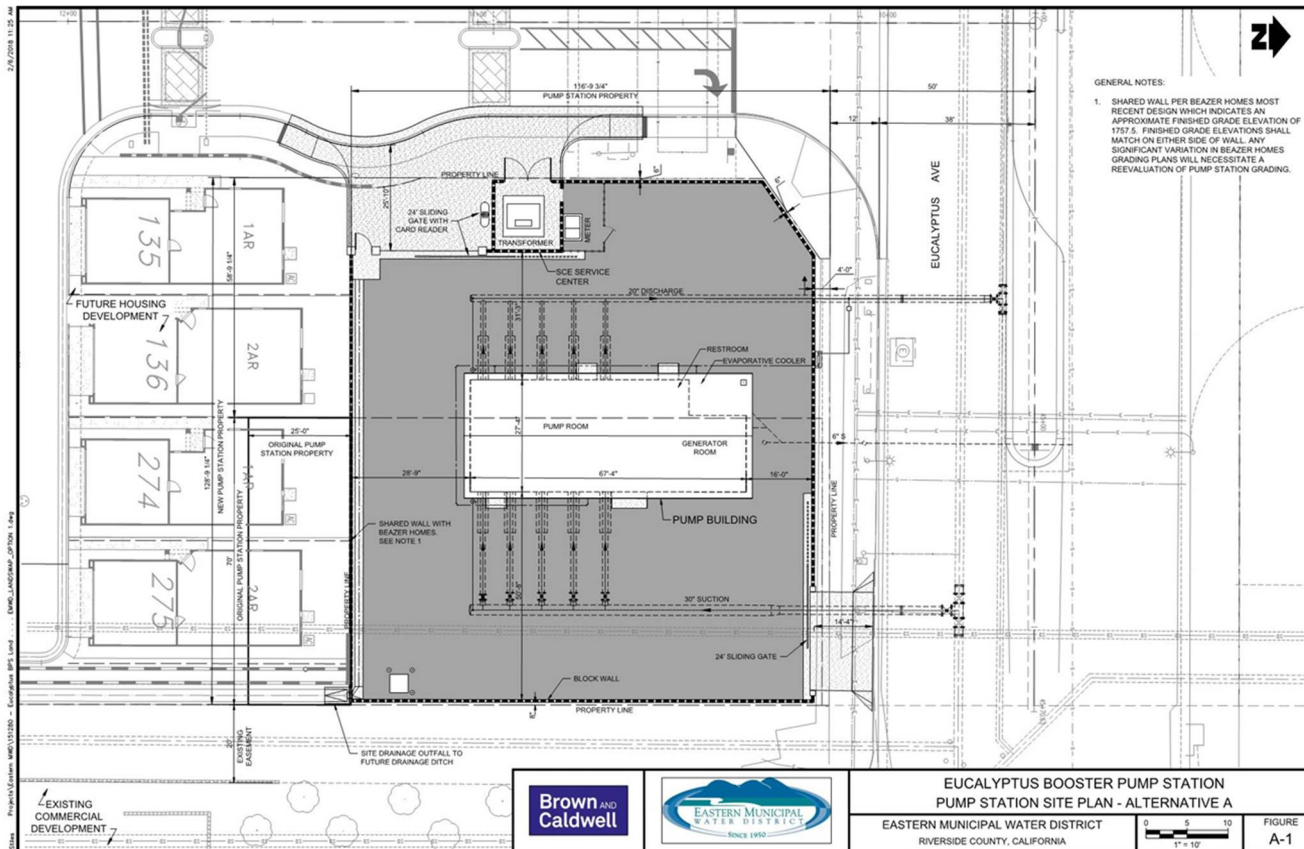

Project Location in Moreno Valley

# Project Land Exchange

# Eucalyptus Booster Station Site Plan

- ü Land exchange resulted in a minor increase in project site area
- ü Project reconfigured to accommodate new facility layout
- ü Pumping capacity increased to meet Water Facilities Master Plan

## Basis for CEQA Addendum

---

- Addendum to IS/MND addresses minor project changes to original Eucalyptus Booster Station project
- No increases in the level of environmental impacts and no changes to adopted mitigation measures of the original project.
- All impacts remain less than significant with implementation of mitigation measures.
- No public circulation required for Addendum, per CEQA Guidelines Section 15164

# Recommendation

---

Approve and authorize the following for the Eucalyptus Booster Station Project:

- Approve Addendum to the November 2010 Initial Study and Mitigated Negative Declaration for the Eucalyptus and Letterman Booster Stations Project including the existing Mitigation Monitoring and Reporting Program (MMRP)
- Authorize Filing of the Notice of Determination and Environmental Filing Fee.
